

Etienne van Rattingen

# The Complete History of Monsanto

## “The World’s Most Evil Corporation”

*The corrupt Belgium way: Roundup may only be used by professionals and cannot be bought by ordinary people. This is why ‘green shops’ are filled with WEEDOL! The same shit, another name! Only the name “Roundup” is prohibited by LAW, not the herbicide GLYPHOSATE! This is how politicians ‘sell’ their peoples lives and health to international companies!*

First published by **Waking Times**, posted by Global Research in May 2014, this article provides a historical viewpoint. It is of particular relevance in relation to the Monsanto-Bayer merger. Monsanto-Bayer is relentlessly pushing the Worldwide adoption of glyphosate, which is carcinogenic.

---

*Of all the mega-corps running amok, Monsanto has consistently outperformed its rivals, earning the crown as “most evil corporation on Earth!” Not content to simply rest upon its throne of destruction, it remains focused on newer, more scientifically innovative ways to harm the planet and its people.*

1901: The company is founded by John Francis Queeny, a member of the [Knights of Malta](#), a thirty year pharmaceutical veteran married to Olga Mendez Monsanto, for which Monsanto Chemical Works is named. The company’s first product is chemical saccharin, sold to Coca-Cola as an artificial sweetener.

Even then, the government knew saccharin was poisonous and sued to stop its manufacture but lost in court, thus opening the [Monsanto Pandora’s Box](#) to begin poisoning the world through the soft drink. 1920s: Monsanto expands into industrial chemicals and drugs, becoming the world’s largest maker of aspirin, acetylsalicylic acid. This is also the time when things began to go horribly wrong for the planet in a hurry with the introduction of their polychlorinated biphenyls (PCBs).

“PCBs were considered an industrial wonder chemical, an oil that wouldn’t burn, impervious to degradation and had almost limitless applications. Today PCBs are considered one of the gravest chemical threats on the planet. Widely used as lubricants, hydraulic fluids, cutting oils, waterproof coatings and liquid sealants, are potent carcinogens and have been implicated in reproductive, developmental and immune system disorders. The world’s center of PCB manufacturing was Monsanto’s plant on the outskirts of East St. Louis, Illinois, which has the highest rate of fetal death and immature births in the state.”(1)

Even though PCBs were eventually banned after fifty years for causing such devastation, it is still present in just about all animal and human blood and tissue cells across the globe. Documents intro-

**De houding van de (EU) politiek, wetenschap, religie, ‘geheime’ clubjes, denktanks en bank maffia naar mij toe is even beledigend als alle woorden die ik gebruik om hun houding te omschrijven**

## Etienne van Rattingen

duced in court later showed Monsanto was fully aware of the deadly effects, but criminally hid them from the public to keep the PCB gravy-train going full speed!

1930s: Created its first hybrid seed corn and expands into detergents, soaps, industrial cleaning products, synthetic rubbers and plastics. Oh yes, all toxic of course!

1940s: They begin research on uranium to be used for the Manhattan Project's first atomic bomb, which would later be dropped on Hiroshima and Nagasaki, killing hundreds of thousands of Japanese, Korean and US Military servicemen and poisoning millions more.

The company continues its unabated killing spree by creating pesticides for agriculture containing deadly dioxin, which poisons the food and water supplies. It was later discovered Monsanto failed to disclose that dioxin was used in a wide range of their products because doing so would force them to acknowledge that it had created an environmental Hell on Earth.

1950s: Closely aligned with The Walt Disney Company, Monsanto creates several attractions at [Disney's Tomorrowland](#), espousing the glories of chemicals and plastics. Their "House of the Future" is constructed entirely of toxic plastic that is not biodegradable as they had asserted. What, Monsanto lied? I'm shocked!

"After attracting a total of 20 million visitors from 1957 to 1967, Disney finally tore the house down, but discovered it would not go down without a fight. According to Monsanto Magazine, wrecking balls literally bounced off the glass-fiber, reinforced polyester material. Torches, jackhammers, chain saws and shovels did not work. Finally, choker cables were used to squeeze off parts of the house bit by bit to be trucked away."(2)

### **Monsanto's Disneyfied vision of the future:**

1960s: Monsanto, along with chemical partner-in-crime DOW Chemical, produces dioxin-laced Agent Orange for use in the U.S.'s Vietnam invasion. The results? Over 3 million people contaminated, a half-million Vietnamese civilians dead, a half-million Vietnamese babies born with birth defects and thousands of U.S. military veterans suffering or dying from its effects to this day!

Monsanto is hauled into court again and internal memos show they knew the deadly effects of dioxin in Agent Orange when they sold it to the government. Outrageously though, Monsanto is allowed to present their own "research" that concluded dioxin was safe and posed no negative health concerns whatsoever. Satisfied, the bought and paid for courts side with Monsanto and throws the case out. Afterwards, it comes to light that Monsanto lied about the findings and their real research concluded that dioxin kills very effectively.

A later internal memo released in a 2002 trial admitted

**De houding van de (EU) politiek, wetenschap, religie, 'geheime' clubjes, denktanks en bank maffia naar mij toe is even beledigend als alle woorden die ik gebruik om hun houding te omschrijven**

## Etienne van Rattingen

“that the evidence proving the persistence of these compounds and their universal presence as residues in the environment is beyond question ... the public and legal pressures to eliminate them to prevent global contamination are inevitable. The subject is snowballing. Where do we go from here? The alternatives: go out of business; sell the hell out of them as long as we can and do nothing else; try to stay in business; have alternative products.”(3)

Monsanto partners with [I.G. Farben](#), makers of Bayer aspirin and the Third Reich’s go-to chemical manufacturer producing deadly Zyklon-B gas during World War II. Together, the companies use their collective expertise to introduce aspartame, another extremely deadly neurotoxin, into the food supply. When questions surface regarding the toxicity of saccharin, Monsanto exploits this opportunity to introduce yet another of its deadly poisons onto an unsuspecting public.

1970s: Monsanto partner, G.D. Searle, produces numerous internal studies which claim aspartame to be safe, while the FDA’s own scientific research clearly reveals that aspartame causes tumors and massive holes in the brains of rats, before killing them. The FDA initiates a grand jury investigation into G.D. Searle for “knowingly misrepresenting findings and concealing material facts and making false statements” in regard to aspartame safety.

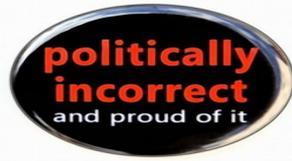

During this time, Searle strategically taps prominent Washington insider Donald Rumsfeld, who served as Secretary of Defense during the Gerald Ford and George W. Bush presidencies, to become CEO. The corporation’s primary goal is to have Rumsfeld utilize his political influence and vast experience in the killing business to grease the FDA to play ball with them.

A few months later, Samuel Skinner receives “an offer he can’t refuse,” withdraws from the investigation and resigns his post at the U.S. Attorney’s Office to go work for Searle’s law firm. This mob tactic stalls the case just long enough for the statute of limitation to run out and the grand jury investigation is abruptly and conveniently dropped.

1980s: Amid indisputable research that reveals the toxic effects of aspartame and as then FDA commissioner Dr. Jere Goyan was about to sign a petition into law keeping it off the market, Donald Rumsfeld calls Ronald Reagan for a favor the day after he takes office. Reagan fires the uncooperative Goyan and appoints Dr. Arthur Hayes Hull to head the FDA, who then quickly tips the scales in Searle’s favor and NutraSweet is approved for human consumption in dried products. This becomes sadly ironic since Reagan, a known jelly bean and candy enthusiast, later suffers from Alzheimers during his second term, one of the many horrific effects of aspartame consumption.

Searle’s real goal though was to have **aspartame approved** as a soft drink sweetener since exhaustive studies revealed that at temperatures exceeding 85 degrees Fahrenheit, it **“breaks down into known toxins Diketopiperazines (DKP), methyl (wood) alcohol, and formaldehyde.”**(4), **becoming many times deadlier than its powdered form!**

**De houding van de (EU) politiek, wetenschap, religie, ‘geheime’ clubjes, denktanks en bank maffia naar mij toe is even beledigend als alle woorden die ik gebruik om hun houding te omschrijven**

## Etienne van Rattingen

The National Soft Drink Association (NSDA) is initially in an uproar, fearing future lawsuits from consumers permanently injured or killed by drinking the poison. When Searle is able to show that liquid aspartame, though incredibly deadly, is much more addictive than crack cocaine, the NSDA is convinced that skyrocketing profits from the sale of soft drinks laced with aspartame would easily offset any future liability. With that, corporate greed wins and the unsuspecting soft drink consumers pay for it with damaged healths.

Coke leads the way once again (remember saccharin?) and begins poisoning Diet Coke drinkers with aspartame in 1983. As expected, sales skyrocket as millions become hopelessly addicted and sickened by the sweet poison served in a can. The rest of the soft drink industry likes what it sees and quickly follows suit, conveniently forgetting all about their initial reservations that aspartame is a deadly chemical. There's money to be made, lots of it and that's all that really matters to them anyway!

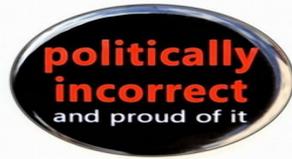

In 1985, undaunted by the swirl of corruption and multiple accusations of fraudulent research undertaken by Searle, Monsanto purchases the company and forms a new aspartame subsidiary called NutraSweet Company. When multitudes of independent scientists and researchers continue to warn about aspartame's toxic effects, Monsanto goes on the offensive, bribing the National Cancer Institute and providing their own fraudulent papers to get the NCI to claim that formaldehyde does not cause cancer so that aspartame can stay on the market.

The known effects of aspartame ingestion are: "mania, rage, violence, blindness, joint-pain, fatigue, weight-gain, chest-pain, coma, insomnia, numbness, depression, tinnitus, weakness, spasms, irritability, nausea, deafness, memory-loss, rashes, dizziness, headaches, seizures, anxiety, palpitations, fainting, cramps, diarrhoea, panic, burning in the mouth. Diseases triggered/mimicked include diabetes, MS, lupus, epilepsy, Parkinson's, tumours, miscarriage, infertility, fibromyalgia, infant death, Alzheimer's... Source : U.S. Food & Drug Administration.(5)

Further, 80% of complaints made to the FDA regarding food additives are about aspartame, which is now in over 5,000 products including diet and non-diet sodas and sports drinks, mints, chewing gum, frozen desserts, cookies, cakes, vitamins, pharmaceuticals, milk drinks, instant teas, coffees, yogurt, baby food and many, many more!(6) Read labels closely and do not buy anything that contains this horrific killer!

Amidst all the death and disease, FDA's Arthur Hull resigns under a cloud of corruption and is immediately hired by Searle's public relations firm as a senior scientific consultant. No, that's not a joke! Monsanto, the FDA and many government health regulatory agencies have become one and

**De houding van de (EU) politiek, wetenschap, religie, 'geheime' clubjes, denktanks en bank maffia naar mij toe is even beledigend als alle woorden die ik gebruik om hun houding te omschrijven**

## Etienne van Rattingen

the same! It seems the only prerequisite for becoming an FDA commissioner is that they spend time at either Monsanto or one of the pharmaceutical cartel's organized crime corps.

1990s: Monsanto spends millions defeating state and federal legislation that disallows the corporation from continuing to dump dioxins, pesticides and other cancer-causing poisons into drinking water systems. Regardless, they are sued countless times for causing disease in their plant workers, the people in surrounding areas and birth defects in babies.

With their coffins full from the massive billions of profits, the \$100 million dollar settlements are considered the low cost of doing business and thanks to the FDA, Congress and White House, business remains very good. So good that Monsanto is sued for giving radioactive iron to 829 pregnant women for a study to see what would happen to them.

In 1994, the FDA once again criminally approves Monsanto's latest monstrosity, the Synthetic Bovine Growth Hormone (rBGH), produced from a genetically modified E. coli bacteria, despite obvious outrage from the scientific community of its dangers. Of course, Monsanto claims that diseased pus milk, full of antibiotics and hormones is not only safe, but actually good for you!

Worse yet, dairy companies who refuse to use this toxic cow pus and label their products as "rBGH-free" are sued by Monsanto, claiming it gives them an unfair advantage over competitors that did. In essence, what Monsanto was saying is "yeah, we know rBGH makes people sick, but it's not alright that you advertise it's not in your products."

The following year, the diabolical company begins producing GMO crops that are tolerant to their toxic herbicide Roundup. Roundup-ready canola oil (rapeseed), soybeans, corn and BT cotton begin hitting the market, advertised as being safer, healthier alternatives to their organic non-GMO rivals. Apparently, the propaganda worked as today over 80% of canola on the market is their GMO variety.

A few things you definitely want to avoid in your diet are GMO soy, corn, wheat and canola oil, despite the fact that many "natural" health experts claim the latter to be a healthy oil. It's not, but you'll find it polluting many products on grocery store shelves.

Because these GM crops have been engineered to 'self-pollinate,' they do not need nature or bees to do that for them. There is a very dark side agenda to this and that is to wipe out the world's bee population.

Monsanto knows that birds and especially bees, throw a wrench into their monopoly due to their ability to pollinate plants, thus naturally creating foods outside of the company's "full domination control agenda." When bees attempt to pollinate a GM plant or flower, it gets poisoned and dies. In

**De houding van de (EU) politiek, wetenschap, religie, 'geheime' clubjes, denktanks en bank maffia naar mij toe is even beledigend als alle woorden die ik gebruik om hun houding te omschrijven**

## Etienne van Rattingen

fact, the bee colony collapse was recognized and has been going on since GM crops were first introduced.

To counter the accusations that they deliberately caused this ongoing genocide of bees, Monsanto devilishly buys out [Beeologics](#), the largest bee research firm that was dedicated to studying the colony collapse phenomenon and whose extensive research named the monster as the primary culprit! After that, it's "bees, what bees? Everything's just dandy!" Again, I did not make this up, but wish I had!

During the mid-90s, they decide to reinvent their evil company as one focused on controlling the world's food supply through artificial, biotechnology means to preserve the Roundup cash-cow from losing market-share in the face of competing, less-toxic herbicides. You see, Roundup is so toxic that it wipes out non-GMO crops, insects, animals, human health and the environment at the same time. How very efficient!

Because Roundup-ready crops are engineered to be toxic pesticides masquerading as food, they have been banned in the EU, but not in America! Is there any connection between that and the fact that Americans, despite the high cost and availability of healthcare, are collectively the sickest people in the world? Of course not!

As was Monsanto's plan from the beginning, all non-Monsanto crops would be destroyed, forcing farmers the world over to use only its toxic [terminator seeds](#). And Monsanto made sure farmers who refused to come into the fold were driven out of business or sued when windblown terminator seeds poisoned organic farms.

This gave the company a virtual monopoly as terminator seed crops and Roundup worked hand in glove with each other as GMO crops could not survive in a non-chemical environment so farmers were forced to buy both.

Their next step was to spend billions globally buying up as many seed companies as possible and transitioning them into terminator seed companies in an effort to wipe out any rivals and [eliminate organic foods](#) off the face of the earth. In Monsanto's view, all foods must be under their full control and genetically modified or they are not safe to eat!

They pretend to be shocked that their critics in the scientific community question whether crops genetically modified with the genes of diseased pigs, cows, spiders, monkeys, fish, vaccines and viruses are healthy to eat. The answer to that question is obviously a very big "no way!"

You'd think the company would be so proud of their GMO foods that they'd serve them to their employees, but they don't. In fact, [Monsanto has banned GM foods](#) from being served in their own

**De houding van de (EU) politiek, wetenschap, religie, 'geheime' clubjes, denktanks en bank maffia naar mij toe is even beledigend als alle woorden die ik gebruik om hun houding te omschrijven**

## Etienne van Rattingen

employee cafeterias. Monsanto lamely responded “we believe in choice.” What they really means is “we don’t want to kill the help.”

It’s quite okay though to force-feed poor nations and Americans these modified monstrosities as a means to end starvation since dead people don’t need to eat! I’ll bet the thought on most peoples’ minds these days is that Monsanto is clearly focused on eugenics and genocide, as opposed to providing foods that will sustain the world. As in Monsanto partner Disney’s Sleeping Beauty, the wicked witch gives the people the poisoned GMO apple that puts them to sleep forever!

2000s: By this time Monsanto controls the largest share of the global GMO market. In turn, the US gov’t spends hundreds of millions to fund aerial spraying of Roundup, causing massive environmental devastation. Fish and animals by the thousands die within days of spraying as respiratory ailments and cancer deaths in humans spike tremendously. But this is all considered an unusual coincidence so the spraying continues. If you thought Monsanto and the FDA were one and the same, well you can add the gov’t to that sorry list now.

The monster grows bigger: Monsanto merges with Pharmacia & Upjohn, then separates from its chemical business and rebrands itself as an agricultural company. Yes, that’s right, a chemical company whose products have devastated the environment, killed millions of people and wildlife over the years now wants us to believe they produce safe and nutritious foods that won’t kill people any longer. That’s an extremely hard-sell, which is why they continue to grow bigger through mergers and secret partnerships.

Because rival DuPont is too large a corporation to be allowed to merge with, they instead form a stealth partnership where each agrees to drop existing patent lawsuits against one another and begin sharing GMO technologies for mutual benefit. In layman’s terms, together they would be far too powerful and politically connected for anything to stop them from owning a virtual monopoly on agriculture; “control the food supply & you control the people!”

Not all is rosy as the monster is repeatedly sued for \$100s of millions for causing illness, infant deformities and death by illegally dumping all manner of PCBs into ground water, and continually lying about products safety – you know, business as usual.

The monster often perseveres and proves difficult to slay as it begins filing [frivolous suits against farmers](#) it claims infringe on their terminator seed patents. In virtually all cases, unwanted [seeds are windblown onto farmers’ lands](#) by neighboring terminator-seeded farms. Not only do these horrendous seeds destroy the organic farmers’ crops, the lawsuits drive them into bankruptcy, while the Supreme Court overturns lower court rulings and sides with Monsanto each time.

**De houding van de (EU) politiek, wetenschap, religie, ‘geheime’ clubjes, denktanks en bank maffia naar mij toe is even beledigend als alle woorden die ik gebruik om hun houding te omschrijven**

## Etienne van Rattigen

At the same time, the monster begins filing patents on breeding techniques for pigs, claiming animals bred any way remotely similar to their patent would grant them ownership. So loose was this patent filing that it became obvious they wanted to claim all pigs bred throughout the world would infringe upon their patent.

The global terrorism spreads to India as over 100,000 farmers who are bankrupted by GMO crop failure, [commit suicide by drinking Roundup](#) so their families will be eligible for death insurance payments. In response, the monster takes advantage of the situation by alerting the media to a new project to assist small Indian farmers by donating the very things that caused crop failures in the country in the first place! Forbes then names Monsanto "[company of the year.](#)" Sickening, but true.

More troubling is that Whole Foods, the corporation that brands itself as organic, natural and eco-friendly is proven to be anything but. They refuse to support [Proposition 37](#), California's GMO-labeling measure that Monsanto and its GMO-brethren eventually helped to defeat.

Why? Because Whole Foods has been in bed with Monsanto for a long time, secretly stuffing its shelves with overpriced, fraudulently advertized "natural & organic" crap loaded with GMOs, pesticides, rBGH, hormones and antibiotics. So, of course they don't want mandatory labelling as that would expose them as the Whole Frauds and Whore Foods that they really are!

However, when over twenty biotech-friendly companies including [WalMart, Pepsico and ConAgra recently met with FDA](#) in favor of mandatory labelling laws, this after fighting tooth and nail to defeat Prop 37, Whole Foods sees an opportunity to save face and becomes the first grocery chain to announce mandatory labelling of their GMO products...in 2018! Uh, thanks for nothing, Whore.

And if you think its peers have suddenly grown a conscience, think again. They are simply reacting to the public's outcry over the defeat of Prop 37 by crafting deceptive GMO-labeling laws to circumvent any real change, thus keeping the status quo intact.

To add insult to world injury, Monsanto and their partners in crime Archer Daniels Midland, Sodexo and Tyson Foods write and sponsor [The Food Safety Modernization Act of 2009: HR 875](#). This "act" gives the corporate factory farms a virtual monopoly to police and control all foods grown anywhere, including one's own backyard, and provides harsh penalties and jail sentences for those who do not use chemicals and fertilizers. President Obama decided this sounded reasonable and gave his approval.

With this Act, Monsanto claims that only GM foods are safe and organic or homegrown foods potentially spread disease, therefore must be regulated out of existence for the safety of the world. If

**De houding van de (EU) politiek, wetenschap, religie, 'geheime' clubjes, denktanks en bank maffia naar mij toe is even beledigend als alle woorden die ik gebruik om hun houding te omschrijven**

## Etienne van Rattingen

eating GM pesticide balls is their idea of safe food, I would like to think the rest of the world is smart enough to pass.

As further revelations have broken open regarding this evil giant's true intentions, Monsanto crafted the ridiculous [HR 933 Continuing Resolution, aka Monsanto Protection Act](#), which Obama robo-signed into law as well. This law states that no matter how harmful Monsanto's GMO crops are and no matter how much devastation they wreak upon the country, U.S. federal courts cannot stop them from continuing to plant them anywhere they choose. ***Yes, Obama signed a provision that makes Monsanto above any laws and makes them more powerful than the government itself. We have to wonder who's really in charge of the country because it's certainly not him! (Proof that politicians have nothing to tell! They are bought and CORRUPT!)***

There comes a tipping point though when a corporation becomes too evil and the world pushes back...hard! Many countries continue to convict Monsanto of crimes against humanity and have banned them altogether, telling them to "get out and stay out!"

The world has begun to awaken to the fact that the corporate monster does not want control over the global production of food simply for profit's sake. No, it's become clear by over a century of death & destruction that the primary goal is to destroy human health and the environment, turning the world into a Mon-Satanic Hell on Earth!

Research into the name itself reveals it to be latin, meaning "my saint," which may explain why critics often refer to it as "Mon-Satan." Even more conspiratorially interesting is that [free masons and other esoteric societies assigned numbers](#) to each letter in our latin-based alphabet system in a six system. Under that number system, what might Monsanto add up to? Why, of course 6-6-6!

Know that all is not lost. Evil always loses in the end once it is widely exposed to the light of truth as is occurring now. The fact that the Monsanto-led government finds it necessary to enact desperate legislation to protect its true leader proves this point. Being evicted elsewhere, the United States is Monsanto's last stand so to speak.

Yet, even here many have begun striking back by protesting against and rejecting GMO monstrosities, choosing to grow their own foods and shop at local farmers markets instead of the Monsanto-supported corporate grocery chains.

The awakening people are also beginning to see they have been misled by corporate tricksters and federal government criminals poisoned by too much power, control and greed, which has resulted in the creation of the monstrous, out-of-control corporate beast.

**De houding van de (EU) politiek, wetenschap, religie, 'geheime' clubjes, denktanks en bank maffia naar mij toe is even beledigend als alle woorden die ik gebruik om hun houding te omschrijven**

## Etienne van Rattingen

See [private research](#) (Dutch) **American Budweiser is the most *Roundup* contaminated beer on earth! (0,1 µg/l is the limit in drinking water. You will be extremely surprised how much poison you drink together with your favorite BEER!)**
