

[\[back\] Why Vaccination Continues](#)

Why Vaccination Continues

by Guylaine [Lanctot](#), M.D.

What is the objective of the world authorities in destroying people's health, both in industrialized countries and in the Third World? It is always difficult to presume the intentions of others, particularly when one is not close to them. And this is true in this instance. But there are certainly advantages for someone, somewhere, to so doggedly keep-up the campaign for vaccinations, by any and all means possible. They must profit someone, somewhere. One thing is certain. It is not to our advantage. In order to determine what these advantages are, and for whom, let us stop and look at the CONSEQUENCES of these massive vaccination programs and draw our own conclusions.

1. Vaccination is expensive and represents a cost of **one billion dollars annually.** It therefore benefits the industry; most notably, the multinational manufacturers. One sells the vaccines. The other then provides the arsenal of medications to respond to the numerous complications that follow. Their profits increase while our expenses go through the roof. To the point where we have simply had it up to here and are ready to accept the unacceptable, such as socialized medicine in the United States, for example.

2. Vaccination stimulates the immune system, the body's defense mechanism. Repeated, vaccination exhausts the immune system. It gives a false sense of security and, in doing so, it opens the door wide to all kinds of illnesses. Notably, to those related to AIDS, which can only develop on ripe ground, where the immune system has been disturbed. It causes AIDS to explode. It ensures that the illness flourishes perpetually.

3. Vaccination leads to social violence and crime. What better way to destabilize a country than to disarm its inhabitants, and reinforce police and military control? The authorities subtly create situations of panic and fear among the population which, in turn, necessitate the reinforcement of "protection measures", including forbidding citizens from owning weapons. The authorities then come across as saviours and strengthen their control. It is certain that, in order to impose a single world army, one must first disarm the citizens of every country. One must therefore create violence, if they are to achieve this disarmament, particularly in the United States where the right to bear arms is guaranteed by the Constitution.

4. Vaccination encourages medical **dependence and reinforces belief in the inefficiency of the body.** It creates people who need permanent assistance. It replaces the confidence one has in oneself with a blind confidence in others, outside ourselves. It leads to loss of personal dignity, in addition to making us financially dependent. It draws us into the vicious circle of sickness (fear -

poverty - submission) and, in this way, ensures the **submission of the herd** so as to better dominate and exploit it. And then lead them to the abattoir. To slaughter.

Vaccination also encourages the moral and financial dependence of Third World countries. It perpetuates the social and economic control of Western countries over them.

5. Vaccination camouflages the **real socio-political problems** of poverty of some due to exploitation by others, and results in techno-scientific pseudo-solutions that are so complicated and sophisticated that patients cannot understand them. In addition, vaccination diverts funds which should be used to help improve living conditions, and channels them into the banks of the multinationals. It widens the gap between the dominant rich and the exploited poor.

6. Vaccination **decimates populations**. Drastically in Third World countries. Chronically in industrialized countries. In this regard, the former President of the World Bank, former Secretary of State in the United States, who ordered massive bombing of Vietnam, and member of the Expanded Program on Immunization, Robert McNamara, made some very interesting remarks. As reported by a French publication, "**j'ai tout compris**", he was quoted as stating:

"One must take draconian measures of demographic reduction against the will of the populations. Reducing the birth rate has proved to be impossible or insufficient. One must therefore increase the mortality rate. How? By natural means. Famine and sickness."
(Translation)

7. Vaccination enables the selection of populations to be decimated. It facilitates **targeted genocide**. It permits one to kill people of a certain race, a certain group, a certain country. And to leave others untouched. In the name of health and well-being, of course.

Take Africa, for example. We have witnessed the almost total disappearance of certain groups. Some 50% dead, estimate the most optimistic. Some 70% dead, according to the less optimistic. As if by chance, many were in the same region, such as Zaire, Uganda, the extreme south of the Sudan. In 1967, at Marburg in Germany, seven researchers, working with green African monkeys, died of an unknown hemorrhagic fever. In 1969, also by chance, the same sickness killed one thousand people in Uganda. In 1976, a new unknown hemorrhagic fever killed in the south of Sudan. Then in Zaire.

It is noteworthy that since 1968, virologists (virus specialists) have installed their sophisticated equipment in certain hospitals in Zaire.

At a CIA hearing, Dr. [Gotlieb](#), a cancerologist, admitted having dispersed, in 1960, a large quantity of viruses in the Congo River (in Zaire) to pollute it and

contaminate all the people who used the river as their source of water. Dr. Gotlieb was named to head up the *National Cancer Institute!*

A couple of years ago, Reuters reported: 'An illness similar to AIDS has killed 60,000 in the south of Sudan. They call the illness, the killer. Families, whole villages, have disappeared This illness, the Kala-azar, takes the form of a fever and loss of weight. The symptoms are the same as those of AIDS The immune system is deficient and one dies of other infections.'

It is obvious that Africa, particularly those countries in the center and to the south, contain fabulous resources that have always incited westerners to crush their inhabitants to take over their riches. And beware anyone who stands in their way. The colonies have disappeared. But not colonialism.

8. Vaccination serves as a form of **experimentation**, to test new products on a great sampling of a population. Under the guise of health and the well being of the population, people are vaccinated against a pseudo-epidemic with products that one wants to study. The **vaccine of hepatitis B** seems to be the choice of authorities to accomplish this goal. Yet, this vaccine is manufactured by a process of genetic manipulation. And it is much more dangerous than the traditional vaccine because it inoculates into the body cells that are foreign to its genetic code. Moreover; this vaccine is produced from virus cultivated on the ovaries of Chinese hamsters. One can only imagine what future generations will look like! But there is more. It is also reported to cause cancer of the liver. Despite all that, it enjoys great popularity among the authorities, who impose it first on all those who work in the health field, and then on the rest of the population.

- In 1986, the medical authorities administered the vaccine against **hepatitis B** to [Native Indian children in Alaska](#), without any explanation or the consent of their parents. Many children fell ill. And several died. It seems there was a virus called RSV (Rous Sarcoma Virus) in the vaccine.
(1)

American Indian tribes have been subjected to many vaccinations. Let us be aware that they are difficult to beat into submission, and they own vast tracts of land which the authorities would like to have for their own benefit.

Recently when I met a group of Native women to chat about health with them, the subject of vaccinations cropped up. I was giving them some information on the topic when, suddenly, the group's nurse confided in me that the federal government had given her complete freedom in the management of their health, but on one strict condition. That every vaccination had to be scrupulously applied to all. The silence was deafening. We all understood.

- In 1988, the Ambassador of Senegal gave a radio interview reporting on the ravages of AIDS in his country where entire villages were being decimated. A few years earlier, scientific and medical teams had come to

vaccinate their inhabitants against hepatitis B.

- In 1978, a [new vaccine](#) was tested on homosexuals in New York. And in 1980, on those in San Francisco, Los Angeles, Denver, Chicago, and St-Louis. Officially, this "new vaccine" was against hepatitis B and, as we now know, it caused many of them to die from AIDS. It sounded the "official" beginning of the AIDS epidemic in 1981.

The vaccination program of homosexuals against hepatitis B was led by Saint W.H.O. and the National Institute of Health . There are reports of collaboration between these two organizations in 1970 to study the consequences of certain viruses and bacteria introduced to children during vaccination campaigns. In 1972, they transformed this study to focus on the viruses which provoked a drop in the immune mechanism.

Wolf Szmunn directed the anti-hepatitis B experiments undertaken in New York. He had very close links with the Blood Centre where he had his laboratory, the National Institute of Health, the National Cancer Institute, the FDA., the W.H.O., and the Schools of Public Health of Cornell, Yale, and Harvard.

In 1994 a vast vaccination campaign against hepatitis B was undertaken in Canada. It is both useless, dangerous and costly. And what for? Is there a hidden agenda? I note that the Province of Quebec is a particular target, over the course of three years.

- 1992: vaccination against meningitis
- 1993: re-vaccination against meningitis
- 1994: vaccination against hepatitis B.

I was there in 1993. It troubled me to see that it was aimed at a whole generation (1 to 20 years), in only one province. Since when do viruses respect borders, and specially provincial ones at that? The facts are:

- There was no epidemic, nor risk of one. Epidemiologists confirmed it.
- Not one but three different vaccines were administered, each in a designated area.
- Certain nurses were selected and trained to administer a special vaccine.
- All children were entered into a computerized data bank.
- The pressure to vaccinate the children was enormous. Schools were turned into clinics. Those who did not want to be vaccinated were pointed out and treated as social outcasts.
- Nurses chased down parents at home who did not want their pre-school children vaccinated.

I had a direct account of one of these kids. The mother did not want her child vaccinated The nurse who came to the house made her believe that it was compulsory. The mother gave in... The child is now handicapped: physically and mentally (paralyzed spastic).

- The vaccination cost \$30 million.

Why was there such a murderous will. Like Native peoples, the people of Quebec are also a "bother". They believe in their cultural identity and in sovereignty. What is more, Quebec with its Native territories, encompasses huge reservoirs of water which many a multinational have their eyes on. As an acquaintance of mine who sits on the California water management board said, "Water today is gold." Could one think of a more appropriate biological weapon to possibly remove any impediments to accessing that resource?

9. Vaccinations permit **epidemiological studies** of populations to collect data on the resistance of different ethnic groups to different illnesses. It permits one to study the reactions of the immune systems of large numbers of the population to an antigen (virus, microbe) injected by vaccination. Should it be within the framework of the fight against an existing illness, or one that has been provoked.

- In 1987, certain American laboratories and the Department of Biotechnology of India signed an agreement authorizing the testing of genetically manufactured vaccines on the people of India. This agreement was met with fierce opposition because it gave access to epidemiological and immunity profiles of a population. This data is extremely important from a military standpoint. It is even more valuable because India has never experienced yellow fever. And, at time of writing this book, it had known only a handful case of AIDS. Over and above all that, the private American laboratories proposed to test products on the Indian population for which they had no right to test in the United States! And the Indian authorities acquiesced!

10. Vaccination is a **biological weapon** at the service of **biological warfare**. It permits the targeting of people of a certain race, and leaves the others who are close by more or less untouched. It makes it possible to intervene in the hereditary lineage of anyone selected. A new speciality is born. **Genetic engineering**. It is flourishing, enjoys much prestige, and is receiving substantial research funds. The challenge is staggering. To find a vaccine which gives an illness against which we already have the vaccine! In this way, we would be able to send in troops who have already been vaccinated against the killer vaccine, which they would then spread among the enemy. **It is absolutely crazy and insane!**

Meanwhile, **industrial theft** is in full swing. Captain and biologist of the *US Navy* at Fort Detrick, Neil Levitt, reported the disappearance of 2.35 liters of an experimental vaccine. A dose sufficient to contaminate the entire world. Fort Detrick is a research laboratory which manufactures vaccines. It is located quite close to Washington, in Maryland, and it is attached to the *National Cancer Institute* at Bethesda, a suburb of the capital.

It is hardly astonishing that, in every major vaccination campaign, one finds

the same tangled web. Government, the military, Saint W.H.O., financiers, researchers, laboratories, universities, the CIA, and the World Bank.

Let us not lose sight of the fact that:

In the name of the defense of our countries, we manufacture the most murderous of weapons. War; whether it be biological or not, is war. And weapons kill. Biological warfare is a giant business, largely financed **BY OUR FUNDS**, through the medium of the military, research, and our donations. It is also financed, and without our knowledge, **BY OUR LIVES**. Those of our children and of millions of innocents who have been sacrificed. It is we, those who live in the Western world, who are responsible for all the illnesses and acts of genocide in the world. By our acceptance of vaccinations, both at home and abroad.
