

The REAL cause for war in Syria

Though the **American** and **Western** peoples are being told children’s fairytales by their “**Deep State**” mainstream media propagandists that a war against **Russia** is because of a supposed chemical attack in **Syria**, this report says, the brutal truth remains that its true reasons lie in protecting the rapidly collapsing “**petrodollar system**” by stopping **Russian** from selling natural gas to **European Union** nations which it will sell in virtually any world currency except the **US Dollar**—and whose first attack came this past January when the **US** comically declared that **Russia’s** new natural gas pipeline to **Europe** “would threaten **European security**”—but that **German Chancellor Angela Merkel** declared would do no such thing—and that has escalated tensions between the US and Germany to the point that new trade war fears are erupting.

In a further bid to support their failing “**petrodollar system**”, this report continues, the Americans have illegally taken over one-third of the entire nation of Syria without a declaration of war or even trying to explain why they have done so—but whose true purpose behind is to build a vast natural gas pipeline through from Qatar and Saudi Arabia to Europe whose purchase will have to be made in **US Dollars**—as opposed to the Russian-backed **Iranian** pipeline whose natural gas payment would be made in either **Euros**, the **Russian Ruble**, or China’s new gold-backed “**petroyuan**”—that now poses the greatest threat to the **US Dollar** its ever faced.

The true cause of World War III is over competing Russian-backed and US-backed pipelines in Syria

To how dangerous, in fact, the **United States** has become in protecting its failing “**petrodollar system**”, this report details, became grimly evident in 2016 when a coup was launched against the **NATO** member nation **Turkey** who had just signed an agreement with **Russia** to jointly build a pipeline whose natural gas would be paid in **Russian Rubles**, not **US Dollars**—and whose coup

Because MSM is not telling THE TRUTH

Etienne van Rattingen – natuurfilosoof

leader was discovered to be **General John F. Campbell**, who was the former **US Commander of the International Security Assistance Force in Afghanistan**, and whom the **Obama** regime paid over \$2 billion to bring down the legitimately democratically elected **Turkish** government—but whose coup ended in complete failure thus ensuring the successful completion of the **Russian-Turkey** pipeline.

In retaliating against **Turkey** for successfully defeating this coup attempt, this report continues, the **Americans** viciously turned on their own **NATO** ally refusing to even sell rifles to their military—thus causing the **Turks** to turn to **Russia** for arms deals—and that in terror of this happening then caused the **US** to directly threaten **Turkey**—but to which **Turkey** responded to by invading the illegally occupied zone the **Americans** control in **Syria**—with **Turkey** then joining with **Iran** and **Russia** to bring the war in **Syria** to a swift end.

Most interesting to note in this report is its conclusion section—and wherein the **Security Council** admits that the **United States** is, indeed, in an existential fight for its survival as without its being able to force other nations to buy **US Dollars** for their oil and gas purchases, its decades long practice of being able to print money out of thin air will end, thus collapsing the “*petrodollar system*” and, in turn, the entire **Western** economic structure.

But whose “*Deep State*” aligned leaders, this conclusion section continues, will not tell the **American** people the truth about over their fears that these people will realize that the alternative to needless war is the **US** finally realizing that it **can no longer rule the world alone**—and in doing so would then allow the trillions spent to maintain massive **US** military forces all around the globe able to be kept in **America** where it can pay off its nation’s massive debt and, literally, rebuild its nation’s cities, airports, roads, schools and hospitals many times over—and that whose current **President Trump** has advocated for years—as he knows that the **\$5 trillion** spent on **Iraq** and **Afghanistan** alone, and counting those “*relevant legacy costs*”—like long-term healthcare commitments to **US** veterans and interest on the debt incurred by these wars—the total for **America’s** needless wars is projected to top **\$12 trillion by 2053**—and at whose current count of about 120 million **US** taxpayers, comes out to a **\$100,000 a head for each and every American citizen**—and that is doing more to destroy the **United States** than anything **Russia** could ever do, except during **World War III**, of course.

If you use TWITTER everyone can DEMONSTRATE politicians are LIARS!
