

# WHO-CDC 'Gates Pandemic Model'

U.S. Surgeon General Drops Outdated Models. US goes for unlocking country

The United States Surgeon General [Jerome Adams](#) recently announced on live radio that the *Coronavirus Task Force* will be dropping old pandemic models from the *Center for Disease Control (CDC)* and *World Health Organization (WHO)* in favor of real-time statistics.

*"What the American people need to know now is we actually have data, and so we're tracking that data."*

**Jerome Adams**

As a result of this shift, some businesses are [set to re-open](#) in May, while others will have to wait until as late as June.

This signals a departure from the [Gates Fauci plan](#) of keeping the nation under lockdown as long as possible.

Older models have predicted as many as a *million deaths*, which later were reduced to about 100,000-240,000, then again to 93,531, 81,766, and finally to the current number of 60,145 [by August](#).

That's **less than** the number of people who [died](#) of the flu during the particularly bad season of 2017-2018.

Using these **unreliable models**, *Dr. Fauci and Bill Gates have been threatening shutdowns of businesses for anywhere from six months to a year and until they can get the public inoculated with a new, minimally tested vaccine.*

Some experts have [called this](#) a,

*"grossly disproportionate response".*

*"We're following this data every single day, and we're giving that data to communities so that they can make informed and intelligent decisions about when and where to reopen," Adams said.*

Even a lift on federal bans would not allow every business to re-open as many states have added another layer of control over their respective economies.

*"I feel confident that some places will start to reopen in May and June. Other places won't; it will be piece by piece, bit by bit, but will be data-driven."*

There has been a lot of talk recently about not letting the "cure" be worse than the disease.

Closing down businesses has drastically affected the economy and as a result, quarantine is [driving many to drugs](#), domestic violence, and suicide.

"But when it comes to suicide, all factors are pushing in the same direction now.

Lack of income, lack of job security, isolation, reduced access to mental health services will all increase suicide risk.

I'm confident of that," said Richard Dunn, an associate professor of economics at the University of Connecticut.

In a tragic event, one teenage woman from the United Kingdom [committed suicide](#) in March after warning her family that,

"more people will die from suicide during this than the virus itself."

"Lockdown mandates... are sending the economy into a tailspin and wreaking havoc with our liberties," [says](#) constitutional scholar John W. Whitehead, as many are wondering whether the government should retain the right to shut down private businesses and force healthy people into quarantine at all.

Now that the [Trump Administration](#) is using *real-time data* instead of 'predictive models,' they suspect that the coronavirus pandemic will be much less destructive than they had ever thought before, while the economy is set to re-open in record time.

I hope Europe will do the same. This Pandemic will be seen as misleading hysterical event and a economical disaster! Rothschild his toilet paper will not work anymore. Governments will have to choose for their people not for ELITE MAFIA anymore! Let ALL banks and pharmaceuticals pay for this economical disaster in stead of being helped with our tax money or earning our tax money by vaccinating all people, even if they have to force everyone by **'LAW'**.
