The Rothschild family is slowly but surely having their Central banks established in every country of this world, giving them incredible amount of wealth and power.

In the year of 2000 there were seven countries without a Rothschild owned or controlled Central Bank:

1. Afghanistan
2. Iraq
3. Sudan
4. Libya
5. Cuba
6. North Korea
7. Iran

It is not a coincidence that these country, which are listed above were and are still being under attack by the western media, since one of the main reasons these countries have been under attack in the first place is because they do not have a Rothschild owned Central Bank yet.

The first step in having a Central Bank establish in a country is to get them to accept an outrageous loans, which puts the country in debt of the Central Bank and under the control of the Rothschilds.

If the country does not accept the loan, [the leader of this particular country will be assassinated and a Rothschild](#)

aligned leader will be put into the position, and if the assassination does not work, the country will be invaded and have a Central Bank established with force all under the name of terrorism.

Rothschild-owned or controlled Central Banks

Central banks are illegally created private banks that are owned by the [Rothschild banking family](#).

The family has been around for more than 230 years and has slithered its way into each country on this planet, threatened every world leader and their governments and cabinets with physical and economic death and destruction, and then emplaced their own people in these central banks to control and manage each country's pocketbook.

Worse, the Rothschilds also control the machinations of each government at the macro level, not concerning themselves with the daily vicissitudes of our individual personal lives. Except when we get too far out of line.

The only countries left in 2003 without a Central Bank owned or controlled by the Rothschild Family were:

1. Sudan
2. Libya
3. Cuba
4. North Korea
5. Iran

The Attacks of September 11th were an inside job to invade Afghanistan and Iraq to then establish a Central Bank in those countries.

The only countries left in 2011 without a Central Bank owned or controlled by the Rothschild Family are:

1. Cuba
2. North Korea
3. Iran

After the [instigated protests and riots in the Arab countries](#) the Rothschild finally paved their way into establishing Central Banks, and getting rid of many leaders, which put them into more power.

The FED and the IRS

Virtually unknown to the general public is the fact that the US Federal Reserve is a privately owned company, sitting on its very own patch of land, immune to the US laws.

This privately owned company (controlled by the Rothschilds, Rockefellers and Morgans) prints the money FOR the US Government, which pays them interest for the “favor.” This means that if we would reset the nation’s debt today and would begin reprinting money, we would be in debt to the FED from the very first dollar loaned to our Government.

Also, most people living in the USA have no clue that the Internal Revenue Service (IRS) is a foreign agency.

To be more accurate, the IRS is a foreign private corporation of the International Monetary Fund (IMF) and is the private “army” of the Federal Reserve (Fed).

Its main goal is to make sure the American people pay their tax and be good little slaves.

Rothschilds Want Iran’s Banks

Source: [American Free Press](#) | By Pete Papaherakles, FEBRUARY 10, 2012

Could gaining control of the Central Bank of the Islamic Republic of Iran (CBI) be one of the main reasons that Iran is being targeted by Western and Israeli powers? As tensions are building up for an unthinkable war with Iran, it is worth exploring Iran’s banking system compared to its U.S., British and Israeli counterparts.

Some researchers are pointing out that Iran is one of only three countries left in the world whose central bank is not under Rothschild control. Before 9-11 there were reportedly seven: Afghanistan, Iraq, Sudan, Libya, Cuba, North Korea and Iran. By 2003, however, Afghanistan and Iraq were swallowed up by the Rothschild octopus, and by 2011 Sudan and Libya were also gone. In Libya, a Rothschild bank was established in Benghazi while the country was still at war.

Islam forbids the charging of interest, a major problem for the Rothschild banking system. Until a few hundred years ago, charging interest was also forbidden in the Christian world and was even punishable by death. It was considered exploitation and enslavement.

Since the Rothschilds took over the Bank of England around 1815, they have been expanding their banking control

over all the countries of the world. Their method has been to get a country's corrupt politicians to accept massive loans, which they can never repay, and thus go into debt to the Rothschild banking powers. If a leader refuses to accept the loan, he is oftentimes either ousted or assassinated. And if that fails, invasions can follow, and a Rothschild usury-based bank is established.

The Rothschilds exert powerful influence over the world's major news agencies. By repetition, the masses are duped into believing horror stories about evil villains. The Rothschilds control the Bank of England, the Federal Reserve, the European Central Bank, the IMF, the World Bank and the Bank of International Settlements. Also they own most of the gold in the world as well as the London Gold Exchange, which sets the price of gold every day. It is said the family owns over half the wealth of the planet—estimated by Credit Suisse to be \$231 trillion—and is controlled by Evelyn Rothschild, the current head of the family.

Objective researchers contend that Iran is not being demonized because they are a nuclear threat, just as the Taliban, Iraq's Saddam Hussein and Libya's Muammar Qaddafi were not a threat.

What then is the real reason? Is it the trillions to be made in oil profits, or the trillions in war profits? Is it to bankrupt the U.S. economy, or is it to start World War III? Is it to destroy Israel's enemies, or to destroy the Iranian central bank so that no one is left to defy Rothschild's money racket?

It might be any one of those reasons or, worse—it might be all of them.
